

FUTERRO D-LACTIDE

LD-D-10 / *Futerro ref.*
D-LACTIDE / *product name*

Description

D-Lactide is produced by direct cyclisation of linear esters or acid oligomers, made by polycondensation of the corresponding D(-)-lactic acid and/or D(-)-lactic acid ester. After several solvent-free purification steps, small white flakes of pure lactide are obtained. Two grades are available in FUTERRO's range

PHYSICO-CHEMICAL PROPERTIES

Chemical name		3,6-dimethyl-1,4-dioxane-2,5-dione
Molecular weight	<i>g/mol</i>	144,13
Molecular formula		C ₆ H ₈ O ₄
Molecular structure		
Melting range	°C	max: 98°-99.8°C

SENSORY CHARACTERISTICS

Appearance		White crystals
Odor	-	Nearly odorless

PURITY

Assay	<i>% w/w</i>	Min. 99
Stereochemical purity	<i>% D(-)</i>	Min. 99
Free acidity	<i>Méq/kg</i>	Max. 10
Water content	<i>ppm</i>	Max. 100
Heavy metals	<i>ppm</i>	Max. 10
Lactide content	<i>% mol.</i>	Min. 99,7
Meso-Lactide content	<i>% mol.</i>	Max. 0,2
GC spectrum	-	Conforms to standard

REGISTRATION

CAS number		10326-41-7
